

Computer/IT Engineering

1. Intelligent traffic Light Control System
2. RFID Attendance System
3. internet Based Wireless PC device Control GSM
4. Wireless Energy Meter
5. Laser based Device Control with 89c52
6. Eye Tracking based Driver Fatigue Monitoring
7. Virtual Shuffling Keypad for secure ATM with Seven Segment Touch screen
8. RFID based Automatic Meter System
9. Bluetooth Wireless 1h,3h Device ON /OFF
10. Finger print Attendance System
11. Face Detection using Virtual Shuffling Keypad for secure ATM with Seven Segment Touch screen
12. RFID based Virtual shuffling keypad for secure ATM
13. Thumb reader attendance system
14. voice attendance System
15. Face detection Attendance system
16. RFID Based attendance System
17. Thumb reader using Virtual Shuffling Keypad for secure ATM with Seven Segment Touch screen
18. Zigbee based automatic energy meter reading and bill generation control System
19. Power Grid Control using Pc
20. Substation control and fault alert system using Pc
